

Go Green... to \$ave Green

Call 1.888.ROOF.270 or visit www.interstateroofing.com.

Interstate offers energy-saving solutions for every budget.

These days there is a lot of buzz about “going green” and the choices can be overwhelming. Interstate has created the chart below as a tool to help you chose the options that are right for you. Your sales representative will be happy to give you a customized quote on any of the environmentally-friendly options you are interested in for your home... just ask!

Exterior Upgrade	Homeowner Benefits	Price Point	Qualify for Rebates?
Recycle	Recycle your roof and save an average of FIVE TONS of roofing debris from going into the local landfill.	\$	
Daylighting	Skylights and solar tubes let in natural light, allowing you to lighten and brighten your space without turning on a light — reducing your electric bill in the process.	\$\$	
Insulation	Forty percent of a home’s conditioned air escapes through the attic. Lower your energy bills with an insulation upgrade in your attic. Owens Corning’s PINK fiberglass insulation is ENERGY STAR®-rated, GREENGUARD-certified and contains the highest certified post-consumer and post-industrial recycled glass.	\$\$ - \$\$\$	✓
Ventilation	Increase the ventilation in your home by adding continuous soffit intake and continuous ridge vent exhaust. This will allow fresh air to flow into the attic and eliminate the stale, moist, mold-causing air that can collect.	\$	
New Windows	Improve the curb appeal of your home, eliminate drafts, and reduce your energy bills by investing in new energy-efficient windows.	\$\$\$ - \$\$\$\$	✓
Materials Upgrade	Many manufacturer’s have come up with “cool colors” that are designed to reflect the sun’s rays. These “cool roofs” reduce energy by using shingles with solar-reflecting granules that keep roofs cooler than conventional shingles. Not only will you reduce smog by offsetting carbon dioxide emissions and the heat island effect, you will make your home more comfortable and energy-efficient. Another option is a “lifetime” shingle. You can keep thousands of pounds of debris from our local landfills by keeping it on your roof.	\$ - \$\$\$	✓
Rain Barrels	During summer months, lawn and garden watering can account for up to 40% of household water usage. Save on water bills by collecting the rain that hits your roof in an attractive rain barrel, which will reduce water consumption, storm water runoff and flooding.	\$	
Solar Panels	Create your own energy by harnessing the sun’s power! Invest in roof-mounted solar panels. Solar power reduces green house gasses and fossil fuel emissions and is clean, renewable energy.	\$\$\$\$	✓
Maintenance	By extending the life of your roof, you keep thousands of pounds of debris out of landfills and avoid more costly repairs in the future. Interstate can create a custom maintenance plan to fit your needs and protect your most important investment... your home.	\$	

\$ = \$250 to \$500 \$\$\$\$ = \$5000 to \$10,000
 \$\$ = \$500 to \$1000 \$\$\$\$\$ = \$10,000 plus
 \$\$\$ = \$1000 to \$5000
